Bandung, Jawa Barat, Indonesia

Summary

Backend Developer with 2+ years of experience building scalable REST APIs and web applications using Java Spring Boot and PostgreSQL. Proven track record of delivering production-ready backend systems with a strong foundation in OOP, database management, and secure authentication. Currently seeking a Backend Engineer role to contribute real impact from day one.

Skills

- **Programming Languages:** Java, JavaScript, SQL, HTML5 & CSS3, PHP, C, C++.
- **Frameworks & Libraries:** Spring Boot & Spring Security, React, Hibernate/JPA, Tailwind CSS, Bootstrap, Thymeleaf.
- **Tools & Technologies:** MySQL, PostgreSQL, Git & GitHub, Swagger, Vercel, Brevo SMTP, Render, Cloudinary, Xendit API.
- **Concepts & Methodologies:** RESTful API Design, Object-Oriented Programming (OOP), Agile/Git Workflow, JWT, RBAC, Google OAuth.
- **Soft Skills:** Team Collaboration & Leadership, Problem Solving & Analytical Thinking, Effective Communication, Time Management, Adaptability & Continuous Learning.

Projects

Greeceri Store – E-Commerce Grocery Full-Stack | Dec 2025

Tech Stack: Java 21, Spring Boot 3, PostgreSQL, Spring Security, JWT, React 19, Vite, Tailwind CSS 4, Xendit API, Cloudinary, Google OAuth, Brevo SMTP

- Built and deployed a full-stack grocery e-commerce platform (live on **Render + Vercel**) with a **User Panel** (product catalog, cart, wishlist, checkout, order history) and **Admin Panel** (product, category, order & user management).
- Implemented a complete authentication system using **Spring Security + JWT** and **Google OAuth**, including Login, Register, and Forgot Password with automated email notifications via **Brevo SMTP**.
- Integrated **Xendit Payment Gateway** for end-to-end checkout processing and **Cloudinary** for dynamic product image storage and delivery.
- Developed an interactive Admin dashboard featuring revenue statistics, sales charts via **Recharts**, and **CSV/Excel report export** functionality.

ZakatNow – Full-Stack Zakat Management Web App | Jun 2025 – Sept 2025

Tech Stack: Java Spring Boot, React, PostgreSQL, Tailwind CSS, JavaMail, Xendit API, JWT, Render, Vercel

- Developed a full-stack zakat and donation management web application with **JWT-based authentication** and **Role-Based Access Control (RBAC)** for Admin, Donor, and Campaign Manager roles.
- Implemented donation campaign features (CRUD operations, image upload, distribution reports, and fund tracking) along with **Xendit Payment Gateway** integration in sandbox mode for transaction simulation.
- Built automated email notifications (registration, successful donation, password reset) using **JavaMail**, and deployed the system via **Render (backend)** and **Vercel (frontend)**.
- Integrated bilingual support (Indonesian–English) and an Admin dashboard displaying donation statistics, user count, and active campaign data.

LocoBooking API (Advanced Java Final Project) | Mar 2025 – Apr 2025

Tech Stack: Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, REST API, Swagger

- Collaborated in a 3-member team to design and build a RESTful train ticket booking API.
- Responsible for **data management (Admin-only CRUD)**, **booking report checking**, and **ticket & route management** (train search, train & seat details, and schedule management).
- Utilized Swagger for API documentation and endpoint testing, ensuring consistent data integration across modules.

DigiLib – Digital Library Management System | Jun 2025 – Oct 2025

Tech Stack: Java 21, Spring Boot, React, Spring Security, MySQL, React, Vite, Tailwind CSS, Axios

- Developed a full-stack digital library system as a **freelance project** for SMA Negeri 2 Plus Sipirok, featuring role-based access for 3 user types (Head Librarian, Librarian, Student).

- Implemented book borrowing and return workflows with **automated fine calculation** (Rp2,000/day overdue, Rp50,000 damaged, Rp100,000 lost) and real-time stock management.
- Built automated email notifications for due date reminders (H-1 and overdue alerts) and integrated **PDF/Excel report export** for transaction statistics and fine summaries.
- Supported **batch CSV/XLSX user import** for efficient onboarding of librarians and students.

Loan Management API (Advanced Java Midterm Project) | Feb 2025

Tech Stack: Java, Spring Boot, Hibernate/JPA, MySQL, REST API, Swagger

- Built a RESTful API for managing customers, loans, and payments independently within 7 days.
- Implemented loan status logic (*Active, Completed, Overdue*) based on due dates and payments.

Education

Bachelor of Informatics Engineering PASIM Nasional University Bandung	<i>Sept 2023 - Present</i>
--	----------------------------

- GPA 3.68 / 4.00
- Recipient of the *Sustainable Community Empowerment (PUB) Scholarship*
- 3-Year Acceleration Program

Experience

Head of Recruitment (PPMB) - PUB Scholarship PASIM Nasional University Bandung	<i>Dec 2024 – Sept 2025</i>
---	-----------------------------

- Oversaw the entire recruitment process for PUB scholarship new students (batch 2025).
- Organized the selection process including document screening, technical tests, and interview stages.
- Worked closely with PUB leadership to ensure transparency and quality standards in candidate evaluation.
- Managed internal communications between divisions to coordinate selection events and data management.

Head of Education & Training Division - PUB Scholarship PASIM Nasional University Bandung	<i>Sept 2024 – Sept 2025</i>
--	------------------------------

- Led technical training programs in Algorithm Logic, DBMS, and Web Development for **20+ scholarship students**, designing curriculum and mentoring capstone projects each session.
- Coordinated with other divisions to align the technical training with PUB’s curriculum goals.
